EXECUTIVE ARCHITECTURE

NFL Events Hub

One events platform for the league, clubs and international markets — built on Adobe, integrated with NFL systems

BUILD & PUBLISH **Club & league authors** Document Authoring / Universal Editor | **Developers** GitHub · JavaScript & CSS blocks | **Preview → Live** in seconds

Seconds
from author to live — no release cycle

One platform
league, club & international events

Zero
fan data stored by the middleware

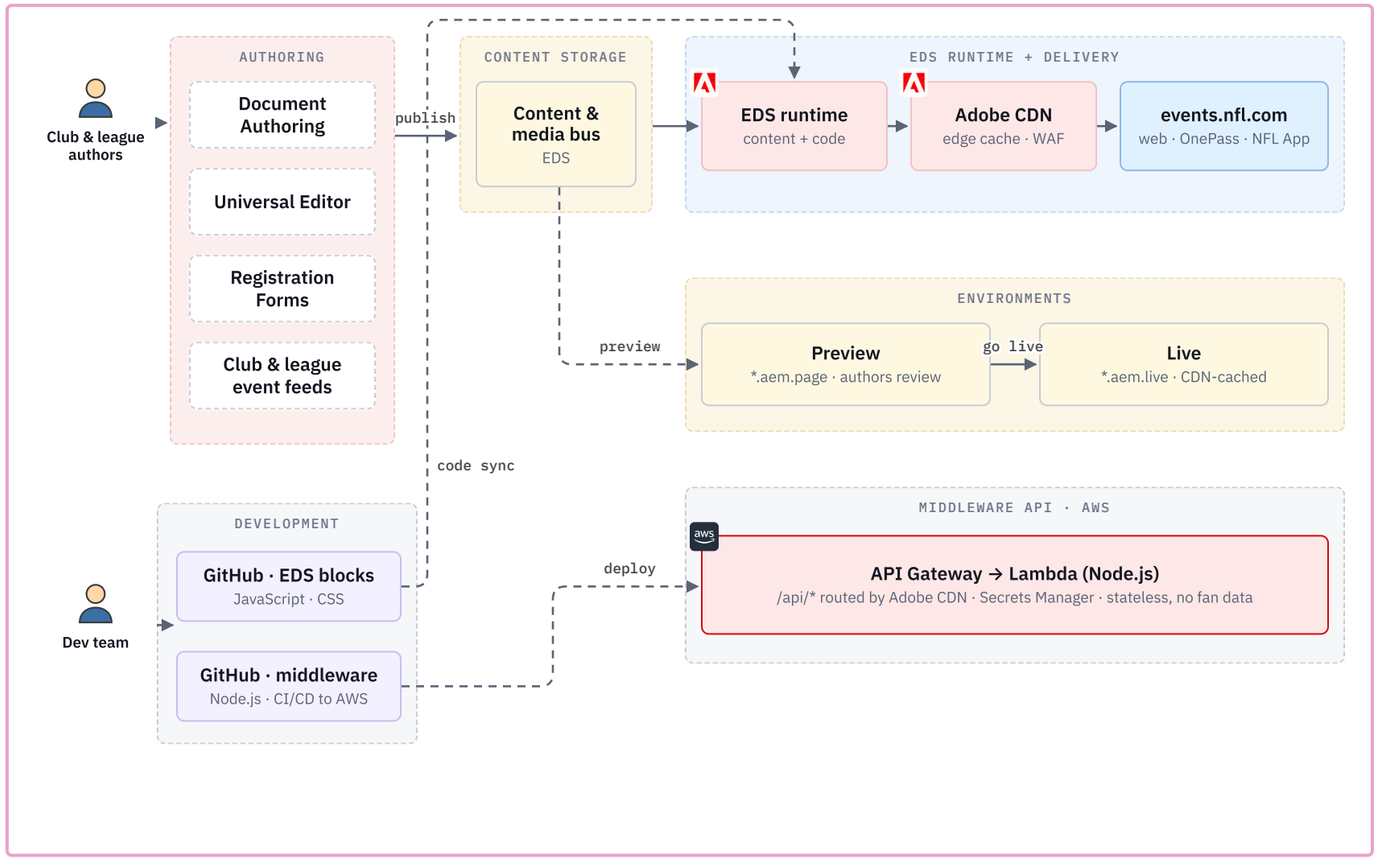

Launch-day ready
edge-cached pages at peak traffic

Adobe — experience & engagement • AWS — secure API layer • NFL — identity, registration & ticketing systems of record

NFL Events Hub on EDS: Platform Overview

What NFL needs

- One platform for league, club & international events
- Free registration & ticketed events
- Guest & signed-in registration with entry QR
- Embedded in NFL OnePass & the NFL App
- Club & market content in local languages
- Fast at peak event moments

How EDS delivers

- ✔ Blocks in JavaScript & CSS — no Java backend
- ✔ Document Authoring or Universal Editor
- ✔ Publish in seconds · Adobe CDN edge delivery
- ✔ Stateless middleware on AWS · no fan data stored
- ✔ Preview & live environments for every change
- ✔ Independent dev / test / release via GitHub

Overall platform flow
