NFL Events Hub — how it works

events.nfl.com · one event platform for web, NFL OnePass and the NFL App

How it works

1. Club & league teams create and publish events in AEM.
2. Fans open events.nfl.com — on the web or inside OnePass and the NFL App.
3. Adobe CDN serves fast pages in the right country and language.
4. Fans sign in once with their NFL ID — the same account as OnePass.
5. Registering sends the fan to Leap, which issues the QR code.
6. Confirmations, reminders and alerts go out through Journey Optimizer and Campaign.
7. Paid events: Buy Tickets opens Ticketmaster — no payments in the hub.
8. Content is personalized with Adobe Target and Real-Time CDP, within the fan's consent.

Leap, OneTrust and the translation partner to be confirmed with NFL.
